

Winwin – Smarter Sustainability Training

Winwin is a web-based solution for companies looking to ensure they have the necessary knowledge about sustainability issues. The solution enables you to reach a large number of staff simply and efficiently. The content can be easily adapted for your specific business.

A new approach

Winwin has been designed and quality-assured in cooperation with KTH Swedish Royal Institute of Technology and representatives from across the business sector. It focuses on the opportunities offered by sustainable development, aiming to both educate staff in your organisation and encourage an interest in sustainability issues.

- ✓ Engaging contents
- ✓ Generates business benefits
- ✓ Produces measurable results

Two training courses in one

The first part ensures a consistent level of knowledge and approach to sustainability among employees. This part is ready for your use.

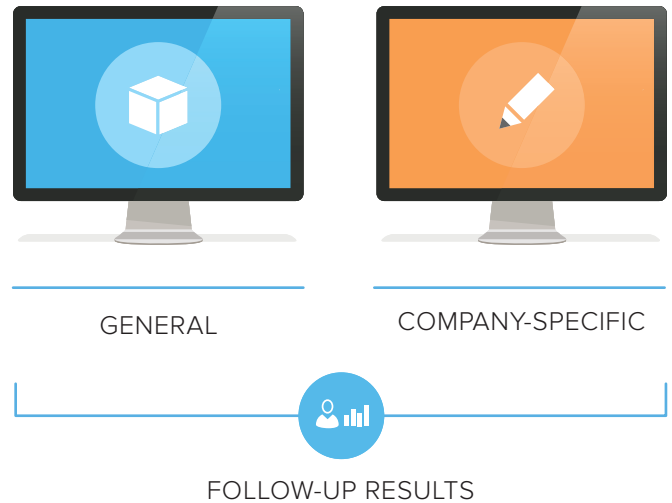

The second part focuses on your company's specific strategies and needs. It is based on your contents. This course will be tailor-made for you.

Follow-up

The product complies with industry standards for measuring performance in e-learning.

Add-ons, as required

- + Follup-up of results
- + Future updates
- + Localisations

Product offering

USERS	GENERAL	COMPANY SPECIFIC	BOTH PARTS
< 200	40 000 SEK	90 000 SEK	130 000 SEK
< 800	90 000 SEK	160 000 SEK	250 000 SEK
> 800	110 000 SEK	160 000 SEK	270 000 SEK

Client cases

Sustainability issues are top of the agenda for real estate company Castellum. To ensure the level of competence generally, all new employees must go through several e-learning courses.

The county council Region Skåne has a web-based sustainability course. This is a general course to suit all employees regardless of workplace.

Future First

Winwin is developed by Future First, a company focussing on digital training solutions for organisations.
